题目描述:

主管期望你来实现英文输入法单词联想功能。需求如下:

依据用户输入的单词前缀,从已输入的英文语句中联想出用户想输入的单词,按字典序输出 联想到的单词序列,如果联想不到,请输出用户输入的单词前缀。

注意:

- 1. 英文单词联想时,区分大小写
- 2. 缩略形式如''don't'',判定为两个单词,''don''和''t''
- 3. 输出的单词序列,不能有重复单词,且只能是英文单词,不能有标点符号

输入描述:

输入为两行。

首行输入一段由英文单词 word 和标点符号组成的语句 str;

接下来一行为一个英文单词前缀 pre。

0 < word.length() <= 20

0 < str.length <= 10000

0 < pre <= 20

输出描述:

输出符合要求的单词序列或单词前缀,存在多个时,单词之间以单个空格分割

补充说明:

示例 1

输入:

I love you

НΔ

```
输出:
```

He

说明:

从用户已输入英文语句"I love you"中提炼出"I"、"love"、"you"三个单词,接下来用户输入"He",从已输入信息中无法联想到任何符合要求的单词,因此输出用户输入的单词前缀。

示例 2

输入:

The furthest distance in the world, Is not between life and death, But when I stand in front of you, Yet you don't know that I love you. f

输出:

front furthest

说明:

从用户已输入英文语句''The furthestdistance in the world, Is not between life and

death, But when I stand in frontof you, Yet you don't know that I love you."

中提炼出的单词,符合"f'作为前缀的,有"furthest''和"front",按字典序排序并在单词

间添加空格后输出,结果为"frontfurthest"。

```
const rl = require("readline").createInterface({ input: process.stdin });
var iter = rl[Symbol.asyncIterator]();
const readline = async () => (await iter.next()).value;

void (async function () {
    // Write your code here
    let input;
    while ((line = await readline())) {
        if (!input) {
            input = line;
        } else {
            const pre = line;
            var words = [...input.match(/[A-z]*/g)];
        }
```

```
const matched = words.filter((word) => word.indexOf(pre) === 0);
if (matched.length > 0) {
      var noRepeatWords = new Set(matched.sort());
      console.log([...noRepeatWords].join(" "));
} else {
      console.log(pre);
}
}
}
})();
```
